OBJECTIVE

Computer Science student seeking a data analyst internship to apply skills in SQL, data analytics, and full-stack development. Experienced in building data-driven projects involving relational databases, dashboard visualization, and analytical problem-solving.

EDUCATION

University of Texas at Tyler

Bachelor of Science in Computer Science | *GPA: 3.1*

Aug. 2023 - Dec. 2026

Tyler, TX

Tyler Junior College

Associates in Computer Science

Aug. 2021 - May 2023

Tyler, TX

Relevant Courses: Computer Architecture, Net Centric Computing, Algorithm Analysis, Operating Systems, Database Management Concepts, Software Development

TECHNICAL SKILLS

Programming: Python, SQL, C++, Java, JavaScript

Technologies: React, Node.js, Express.js, PostgreSQL, MySQL, Git, Tableau, Power BI

Data & Analytics: SQL, Pandas, Matplotlib, Excel

Developer Tools: VS Code, GitHub

Bilingual: English, Spanish

PROJECTS

Healthcare Analytics Platform & Patient Funnel Analysis

React, Node.js, Express.js, PostgreSQL, SQL, Recharts, Git, REST APIs, Data Visualization, Dashboard Analytics

- Developed a full-stack healthcare analytics platform tracking patient appointments, KPIs, and workflow efficiency
- Designed a PostgreSQL database for patient, provider, appointment, and check-in records
- Built REST APIs with Express.js to process appointment data and calculate operational metrics
- Developed interactive healthcare analytics dashboards using React and Recharts
- Implemented patient funnel analysis to measure appointment-stage drop-off rates
- Analyzed workflow bottlenecks using healthcare operational and funnel-stage metrics

US Housing Market Analysis

Python, Pandas, Matplotlib, SQL, Tableau, Data Cleaning, Data Visualization

- Performed exploratory data analysis on U.S. housing market data using Python and Pandas
- Cleaned and transformed raw housing datasets into structured numerical features for analysis
- Built visualizations and correlation analyses to identify pricing trends and market patterns
- Analyzed feature relationships and identified weak linear correlations affecting price prediction accuracy
- Created data-driven insights using Tableau dashboards and statistical analysis techniques

HealthConnect Database

- Collaborated in a 6-member team to deliver a complete database solution
- Designed and implemented a relational healthcare database system using SQL
- Developed normalized database schemas and structured patient appointment records
- Wrote SQL queries to extract, filter, and analyze healthcare-related data

ACTIVITIES

Cybersecurity and Data Analytics Club - University of Texas at Tyler

- Attend weekly meetings focused on digital safety, network defense, and real-world cybersecurity challenges
- Participated in team-based security challenges to strengthen technical problem-solving and collaboration
